

The health and safety of our delegates, speakers, exhibitors and staff will always be our number one priority. To ensure Fertility 2022 complies to COVID-19 secure standards, the following measures have been put in place

### Entry requirements

- All attendees need to have taken a lateral flow test **24 hours** before arriving at the venue. By arriving at the conference, you are confirming that you have taken the test and the result was negative.
- If your lateral flow test is positive or if you show Covid symptoms or feel unwell before travelling to the venue, then we ask that you please remain at home, or leave the event if you develop these onsite.
- All attendees must be fully vaccinated or have proof of a recent negative test.
- You may be asked by ACC staff to provide proof of your COVID-19 status.

### Onsite

- A testing facility is available onsite in the exhibition centre next to the venue – please follow the signs and retest on Day 2 if not fully vaccinated.
- Mask wearing is encouraged in corridors and busy areas.
- Use the sanitisation stations positioned throughout the venue.
- Constant airflow from outside is pumped through the ventilation system.
- Socially distanced seating areas are available at the rear of all sessions.
- We encourage no-contact greetings (ie no hand shaking).
- Only contactless payment is available in the venue – cash transactions are not possible.
